What is HAML?

▸ **Beautiful, DRY, well-indented, clear markup**

▸ **"Templating haiku"**

```erb
<section class="container">
  <h1><%= post.title %></h1>
  <h2><%= post.subtitle %></h2>
  <div class="content">
    <%= post.content %>
  </div>
</section>
```

```erb
<section class="container">
  <h1><%= post.title %></h1>
  <h2><%= post.subtitle %></h2>
  <div class="content">
    <%= post.content %>
  </div>
</section>
```

```haml
%section.container
  %h1= post.title
  %h2= post.subtitle
  .content
    = post.content
```
